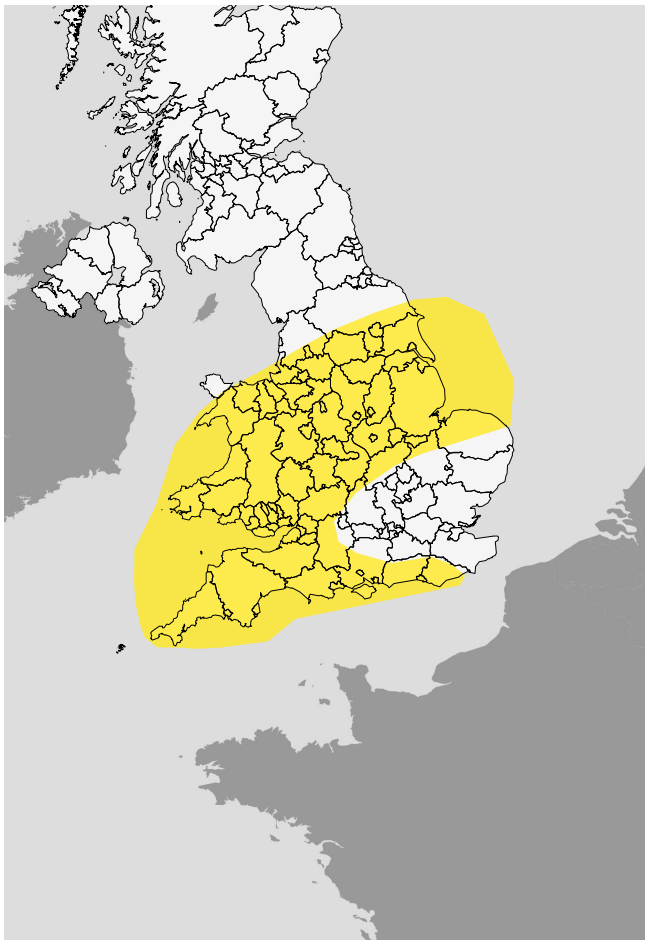
Yellow warning
Rain

Between
17:00 Mon 1 Jan 2024 and
21:00 Tue 2 Jan 2024



Heavy rain falling on saturated ground is likely to cause some travel disruption.

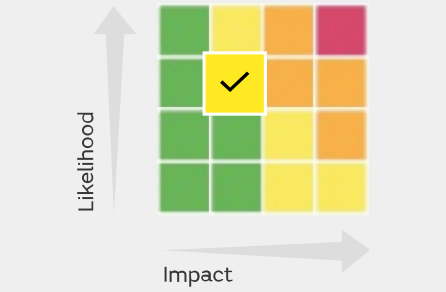
What to expect

- Spray and flooding on roads probably making journey times longer
- Bus and train services probably affected with journey times taking longer
- Flooding of a few homes and businesses is possible
- Some interruption to power supplies and other services possible

Further details

Following recent wet weather, a further spell of rain, heavy in places, will move northeastwards on Tuesday. 10-20 mm of rain falling fairly widely, with a few places seeing 30-40 mm, this on top of the overnight rainfall.

The worst of the rain should clear southwestern areas of England and south Wales by around the middle of Tuesday but could last into the evening across the northeast of the warning area.



Medium likelihood of low impacts

Yellow warning
Rain

Between
17:00 Mon 1 Jan 2024 and
21:00 Tue 2 Jan 2024

Further Details (continued)

Strong winds will affect parts of the area, with separate wind warnings in place.

What should I do?

Check if your property could be at risk of flooding. If so, consider preparing a flood plan and an emergency flood kit.

Give yourself the best chance of avoiding delays by checking road conditions if driving, or bus and train timetables, amending your travel plans if necessary.

People cope better with power cuts when they have prepared for them in advance. It's easy to do; consider gathering torches and batteries, a mobile phone power pack and other essential items.

Be prepared for weather warnings to change quickly: when a weather warning is issued, the Met Office recommends staying up to date with the weather forecast in your area.

Reason for update

More persistent rain area now expected to be further north into northern England, with warning area adjusted accordingly. Some more sensitive parts of southern/southeast England also added.
